

Information and news about the latest developments in the iXeed-family of seed analyzing- and sorting equipment

SeQso exhibits in 2013

For **SeQso 2013** was to strengthen relationships with visitors we met at previous congresses and exhibitions. Some of the requests at these customer contacts have already been addressed with iXeed solutions. We exhibited at the **I.S.F. 2013** in Athens, Greece. On new market demands we anticipated in the development of our innovative analyzer, the **iXeed SeedLiner**.

At the **A.P.S.A. 2013** in Kobe, we gladly welcome you to inform you on this newly developed single seed handling device. Come and see us at **BOOTH 34, 1st floor** of the *Kobe International Exhibition Hall*. **Looking forward meeting you there!**

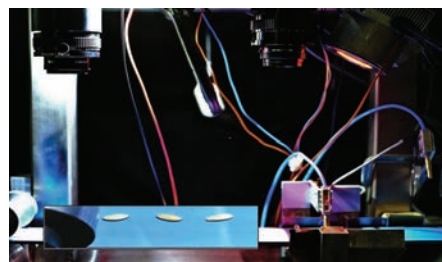

iXeed SeedLiner: Single Seed Handling

We were frequently asked for a machine or analyzer to handle single seeds in uncalibrated small lots. The demand for a sorting technique like for instance measuring the characteristic features of each single seed, has now become available..... We present the (patent pending) **innovative iXeed SeedLiner!**

The **iXeed SeedLiner** is presented as a platform for single seed handling. It can be equipped with analyzing modules such as:

- Chlorophyll
- X-Ray
- Color
- Size/Shape
- Germination
- Multispectral

Join the iXeed-Family!

The **iXeed CF Analyzer Mobile** is one of our seed analyzers that has been greatly appreciated by our customers and relations. Using this mobile analyzing tool, resulted in the purchase of iXeed seed sorting machines by **major European & American Seed Companies!**

Please find below a summary:

- **Liquid Density Sorter:**
- **Chlorophyll Sorter:**
- **X-Ray Sorter** (now available!)
- **Visual Sorter**
- **Smart Seed Sorter** & hotel feeder
- **SeedLiner** (available in 2014)

These machines are available for various capacities & functionalities. Without say we will be working on faster and even more innovative solutions for upgrading your seed lots! If you are interested, please contact us for further detailed information and the possibility to use our **iXeed CF Analyzer Mobile** for testing your seeds on a **trial base agreement**.

The crew of SeQso would like to wish you a very interesting and fruitful A.P.S.A. 2013 in Kobe - Japan.

Happy Holidays

We wish all our relations & their families Happy Holidays & a prosperous 2014!
